Objective

Passionate and dedicated software developer with experience in frontend and backend development, specializing in JavaScript frameworks like React and Node.js. Committed to building innovative, user-friendly applications, with recent experience in developing landing pages for fashion schools and inventory management systems. Actively exploring emerging technologies like AI and blockchain to further enhance my skill set.

Education

Bachelor's Degree, Computer Science

EGERTON UNIVERSITY

(Expected Graduation Date: 2027)

- Registration Number: S13/03019/23
-

Skills

- **Languages & Frameworks:** JavaScript, React, Node.js, MongoDB, HTML, CSS, Framer Motion
 - **Tools & Technologies:** Render, Git/GitHub, Framer Motion, Three.js, Vertical Timeline
 - **Design Preferences:** Slate color theme, dark and classic themes, bold and bright color schemes
 - **Soft Skills:** Problem-solving, adaptability, effective communication, teamwork
-

Professional Experience

Web Developer (Freelance)

- **Fashion School Website for Sir Jay**
 - Designed and developed a landing page using React frameworks like Framer Motion, incorporating motion effects and counters to display course offerings and student enrollments.

- Implemented a responsive, user-friendly UI with animated, non-static images using Framer Motion to improve user engagement.
 - Managed themes, including a black-and-gold palette for the contact page, ensuring visual consistency across the site.
 - **Inventory Management System**
 - Built a stock and product management system with React (frontend) and Node.js/MongoDB (backend).
 - Structured dynamic components to calculate buying/selling prices and profit displays, handling conditional rendering for inventory views.
 - Integrated data handling for frontend payment displays using backend data, optimizing user flow and accuracy in financial tracking.
 - **Drodean Website Deployment**
 - Deployed the Drodean website on Render, managing production environments and ensuring seamless user experience and accessibility.
 - Troubleshoot deployment issues, specifically maintaining restricted access for logged-in users on profile pages.
-

Projects

- **Landing Page for Real Estate Platform**
 - Designed a user profile page with secure access for authenticated users. Created surveys to understand user preferences on house buying and selling.
 - Built the website with React (frontend) and Node.js/MongoDB /FireBase(backend).
 - **Responsive Portfolio Site**
 - Built a personal portfolio using React and modern JavaScript libraries to showcase past projects and technical skills effectively.
-

Extracurriculars and Interests

- Exploring new JavaScript frameworks like React Native and mobile development.
 - Engaged in side projects and learning opportunities in AI and blockchain technology.
 - Keen interest in UI/UX design, focusing on modern, visually engaging, and interactive interfaces.
